Thanks Gary, I fully understand that all activities to implement the removals are subject to your contractor's completion of the removal and cleaning activities ST1.

Mickey

We still need to get the acid sludge out of ST1. We have to drum it so the labor will be significant.

Terry,

Lonestar Ecology is entertaining the possibility of removing the ASTs located at the CES site and erecting the ASTs at their facility. The EPA has completed the removal/disposal of the liquids/sludge's contained within the ASTs and have pressured washed the interiors. The ASTs currently meet the criteria for attainment of RCRA clean status and can be transported to the Lonestar facility. Therefore, other than notifying the TCEQ of Lonestar's removal activities, what are your requirements?
